Only the best
for your smile.

If you thought having braces meant hiding your smile, you might want to think twice.

PLUS "clear" braces are very small and match the natural colors of your teeth. They are more subtle than metal, while providing the same orthodontic treatment. With virtually invisible PLUS braces, you will have greater confidence and the assurance that people are looking at your smile, not your braces.

The new standard in comfort.

PLUS braces are smaller in size, smoother and more comfortable than other "clear" braces. The edges of the braces are gently rounded to prevent irritation to the inside of your lips and cheeks. These characteristics make PLUS braces not only more comfortable to wear than metal, but make it easier to keep your braces clean.

The choice of leading orthodontists.

Our office uses specially designed PLUS braces to provide you with improved comfort, appearance and oral hygiene. PLUS braces provide a highly refined treatment method that requires gentler forces than other appliances. Surgery or the use of headgear is rarely needed.

Around the world, orthodontists are choosing PLUS braces. That's because PLUS braces are durable and strong, offer top performance, and a treatment time that's comparable to metal braces.

With PLUS braces, you can be sure that you're getting the best, with a smile you'll be proud to show off.

Normal metal braces are more visible when you smile.

With PLUS braces, all they'll see is you.

Show off your smile,
not your braces.
